

## TPA Series

Vapor-Tight LED Light

# TPA

## LED Garage Light Highbay Fixture

LED garage lights are surface mount or suspended overhead ceiling lights ideal for task and general ambient lighting. These led garage lighting is commonly used for mechanic shops, workstations, home garages and storage rooms.

Vapor-tight linear LED Garage Lights 4ft feature power selectable ranges of 32-40-50 watts and CCT selectable ranges of 3000K-4000K-5000K. And they also are built with a 1-10vdc dimming and motion sensor. Therefore, these linear garage led lights are powerful lighting in harsh environments, protecting the light source from dust and moisture.

### DESCRIPTION

LED Garage Lights can be adjustable power ranged from 32watts, 40 watts to 50 watts and CCT changed from 3000K, 4000K and 5000K. And they also are built with a standard 1-10vdc dimming driver. In addition, the fixtures feature vapor-tight rated housing, which also are IK08 and V0 rated and coming with frosty or clear strip cover for option. Waterproof Ip66 rated fixtures are suitable for indoor or outdoor wet/damp usage. High lumen output level up to 150 LPW of led vapor tight light fixtures usually are applied for storage areas, warehouses, shops and garages etc.

#### CONSTRUCTION & MATERIALS

- ◆ IK 08 & V0 shatter-proof polycarbonate housing
- ◆ Lm80 SMD 2835 LED with Ra>80
- ◆ Shatter-proof & Frosty cover
- ◆ Liquid tight connector available
- ◆ Stainless steel fastener

#### INSTALLATION

- ◆ Chain Pendant/Surface mounted

#### ENVIRONMENTAL SYSTEM

- ◆ IP 66 rated for wet and damp location usage
- ◆ Indoor/outdoor wet/damp location
- ◆ Ambient Temp.: -30°C - +50°C (-22°F -122°F)

#### FINISH

- ◆ Grey

#### ELECTRICAL SYSTEM

- ◆ Input voltage 100-277VAC, 50/60Hz
- ◆ ETL/cETL listed,
- ◆ CE/RoHS
- ◆ DLC QPL

#### OPTICAL SYSTEM

- ◆ 130 LPW /150 LPW.
- ◆ CCT selected range from 3000K-4000K-5000K
- ◆ Beam angle 120°

#### LIGHTING CONTROL

- ◆ 0-10vdc dimming available
- ◆ Power selected from 32W-40W-50W
- ◆ Microwave motion sensor available
- ◆ Photocell for dusk-dawn work mode available

#### WARRANTY

- ◆ 5 Years

#### STANDARD

- ◆ EN61347-1, EN61347-2-13, EN60598-2-1, EN60598-1
- ◆ UL 924, UL 1598, CAN/CSA -C.22.2 NO. 250.0,

### ACCESSORIES & MOUNT GUIDE

This LED garage light is easily installed to the ceiling with suspending kit. No hard-wiring is needed. A lot of time and labor costs will be saved.

Standard Package Kit

Optional Suspended Kit (5ft long)

Optional Conduit Fitting Liquid Tight Connector

### OPTIONAL MOTION SENSOR

Motion Sensor is a moving object sensor that can detect range of 360° and its working frequency is 5.8GHz. The advantage is stable working state (stable working temperature: -40°C ~ +70°C), adopts a microwave sensor (high-frequency output < 0.2mW), so that it is safe and performs better than infrared sensor.

### Features

- Fully adjustable high and low dimmed light levels from 0-10VDC
- Designed for LED fixtures; rated for extreme temperatures and up to 200,000 on/off cycles
- Adjustable via handheld wireless configuration tool
- Adjustable time delay and cut off delay from 10 seconds to 60 minutes
- Provides line voltage On/Off switching and 0-1 0VDC dimming control
- Works with ballasts or LED drivers
- Adjustable ramp up and fade down times
- High inrush stability zero crossing circuitry for reliable, long-life operation catching relay is durable for all load

### Daylight Harvest Function

This function inside the motion sensor to achieve tri-level control, for some areas which require a light change notice before switch-off. The sensor offers 3 levels of light: 100% --> dimmed light (natural light is insufficient) --> off; And 2 periods of selectable waiting time: motion hold-time and stand-by period; Selectable daylight threshold and freedom of detection area.

### ON-OFF MODE

The microwave sensor to achieve tri-level dimming control, for same areas that require a light change notice before switch off.

With sufficient ambient light, the sensor does not switch on the lamp.

With insufficient ambient light, the sensor switches on the lamp when motion is detected.

After hold time, the lamp gradually dims down if no motion detected.

### 3-STEP DIMMING MODE

It offers 3 levels of the light Control: 100%-dimming light (0,10%,30%,50%) --off; and 2 periods of selectable waiting time: motion hold-time and stand-by time. Selectable daylight threshold and choice of detection area.

With sufficient ambient light, the sensor does not switch on the lamp.

With insufficient ambient light, the sensor switches on the lamp when motion is detected.

After hold time, the sensor dims the lamp at a low light level if no new motion trigger.

After stand-by period, the sensor switches off the lamp if no motion is detected in its detection zone.

### OPTIONAL EM BATTERY

When the AC power goes out, the emergency driver detects the AC power outage and automatically switch to the working emergency mode. The green LED light off. When the AC power is restored, the emergency driver backs to AC power working and starts re-charging, the green LED light on.

### Features

- Meet most of safety standards for lighting
- Battery protections over charge protection over discharge protection short circuit protection
- Standard CSA C22.2 NO.141, UL924
- External Li-ion, LiFePO4 or Ni-MH battery
- The batteries Meet 500 cycles of standard CH and standard DCH
- Indicator shows a variety working modes
- RoHS compliant
- Standard 1.5 hours (2 hrs, 3hrs for options)

### Specifications

- Input Voltage: 100-277Vac, 50/60Hz
- AC Input Current: 100mA max.
- AC Input Power Rating: 7.0W max.
- Output Current and Voltage: 25-48Vdc
- Output Power: 8W /15W
- Emergency Time: ≥1.5H
- Full Warranty: 5 Years
- Test Switch Indicator Light
- Illuminated Test Switch, indicator Light
